

## **Level I Fieldwork (A) Learning Objectives**

At the completion of this course, the successful occupational therapy (OT) student will be able to:

1. Apply knowledge of HIPAA guidelines, the AOTA code of ethics, and the Standards of Practice in OT in the context of the Fieldwork site.
2. Demonstrate sound judgement regarding safety of self and others and adhere to Fieldwork site safety regulations.
3. Demonstrate appropriate professional behaviors: time management, organization, self-directed learning, communication, and use of professional terminology.
4. Describe the values and beliefs of OT.
5. Define the role of OT in relation to the Fieldwork setting.
6. Identify and provide evidence that can inform clinical practice at the Fieldwork site.
7. Articulate the purpose of interprofessional collaboration in healthcare and interpret how those concepts are implemented at the Fieldwork site or could be implemented if it is not already established.
8. Identify psychosocial factors for the client and/or population at the Fieldwork site and describe how those factors can influence occupational performance.
9. Describe how social determinants of health influence the client and/or population at the Fieldwork site and identify actions that OTs can take ensure these factors are being considered during the therapeutic process.
