

# Speech-Language Pathology Clinical Observation Log

Printed Name of Applicant: \_\_\_\_\_ Intended Year of Enrollment: \_\_\_\_\_

A minimum of 25 hours of guided clinical observation is required for application to the MS-SLP Program. Please type or print clearly.

Date(s)	Hours	Location	Description of Experience	CCC-SLP Signature(s)	CCC-SLP Name(s)	CCC-SLP ASHA#
<b>Total:</b>						

\*Per the [ASHA SLP Certification of Standards](#), twenty-five (25) hours of guided clinical observation hours must be completed in the undergraduate or graduate program and generally precede direct contact with clients/patients. Guided clinical observations may occur simultaneously during the student’s observation or afterwards through review and approval of the student’s written reports or summaries. Students may use video recordings of client services for observation purposes. Examples of guided clinical observations with a clinical educator who holds the CCC-SLP may include but are not limited to the following activities: 1) debriefing of a video recording 2) discussion of therapy or evaluation procedures that had been observed 3) debriefings of observations that meet course requirements 4) written records of the observations.

It is important to confirm that there was communication between the clinical educator and observer, rather than passive experiences where the student views sessions and/or videos. The student is encouraged to (a) observe live and recorded sessions across settings with individuals receiving services for a variety of disorders and (b) complete debriefing activities as described above. The graduate program will determine how the guided observation experience should be documented. Evidence of guided observations includes signatures from the clinical educator and documentation of hours, dates, and activities observed.
