

HRSA-MUSC Occupational Therapy Scholarships

Creating opportunities for entry-level OTD students, increasing workplace diversity, and supporting medically underserved communities.

The Health Resources & Services Administration (HRSA) Scholarships for Disadvantaged Students program awarded the MUSC Division of Occupational Therapy a 5-year, \$3.25 million (\$650,000 per year) grant beginning July 2020 to provide scholarships for students from geographically and/or economically disadvantaged backgrounds. The grant aims to increase diversity in the workplace, increase opportunities for students with a demonstrated financial need, and promote the needs of medically underserved communities.

Scholarship Information

Each year, new and existing students in the entry-level Occupational Therapy Doctorate (OTD) program that meet the outlined eligibility requirements may apply for the scholarship. Approximately twelve scholarships will be awarded per cohort and the recipients will receive funding for at least half of tuition and book costs.
