## RESEARCH

### RESEARCH INTERESTS

- Diversity, equity, and inclusion
- Interprofessional education, community engagement, and occupational therapy clinical education
- Describe and investigate health disparities including environmental, functional outcomes, and health promotion and secondary prevention of persons aging with chronic conditions, persons in medically underserved areas, and medically underserved populations.
- Develop and translate effective patient-centered, community-based research interventions into clinically relevant practice with collaborations between clinical research, clinical practice environments, and actively engaged community stakeholders.
