Inpatient Services	X	X	X	X	X	X	X
Enrollment Detail	X	X	X	X	X	X	X

*Medicaid data sets contain indicators of patient race and span ages 0-89 years. These files have no geographical indicators or any measures of rural or urban residence, they are from “representative” US states but we do not know which states are included.

General Description of Truven Health MarketScan® Research Databases

The Truven Health MarketScan® Research Databases contain individual-level, de-identified, healthcare claims information from employers, health plans, hospitals, and Medicare and Medicaid programs. Data about individual patients are integrated from all providers of care, maintaining all healthcare utilization and cost record connections at the patient level. MarketScan is a registered trademark of Truven Health Analytics Inc., an IBM Company.
